I am a web developer with nearly two years of experience as a freelancer, specializing in frontend and fullstack website development. I thrive in collaborative environments but am also capable of working independently, and I take pride in delivering websites that meet client expectations and receive positive feedback.

## Experiences

---

### Freelance Web Developer

March 2023 - Present

- Designing and developing programs
- Analyze the problems and goals desired by the client from the program to be created

### General Chairman of the Himpunan Mahasiswa

September 2022- September 2023

- Organizing members to achieve common goals and organizational objectives
- Establish relationships with outside organizations and collaborate

## Educations

---

### Informatic Engineer – S1

Universitas Muhammadiyah Jember

September 2020 - expected August 2025

### Mathematics and Science

SMA Negeri 1 Glenmore

June 2017 – April 2020

## Projects

---

### SISED0-Fakultas Teknik (Frontend)

I developed a system for faculty lecturer performance evaluation, collaborating with the backend team to deliver a solution that streamlines the workflow for both academic leaders and lecturers. This system significantly improves efficiency in performance review processes.

### SIMR-Fakultas Teknik (Frontend)

create and develop a website to help the faculty to manage the faculty's agenda. collaborate with the team to create an interactive, easy-to-use website with a professional appearance.

### Gogo Journal (Frontend)

Create and develop a website to help study programs make it easier to evaluate the performance of each lecturer. The website was built using the ReactJS library which excels in single page applications.

### **Mini HRIS Website, Location-Based Attendance**

I succeeded in creating a mini HRIS website which is a simplified version of an HRIS website. The website that I built has a feature for taking attendance using a location basis
